

Chief Information Security Officer | Cybersecurity & Risk Executive

Transformational cybersecurity executive with global experience leading enterprise security strategy, risk management, and technology transformation across financial services, government, and Fortune 500 environments. Proven ability to build and scale security programs, lead complex regulatory initiatives, and protect critical digital assets in highly regulated and high-risk environments.

Recognized for combining deep technical expertise with executive leadership, driving measurable improvements in security posture, operational efficiency, and regulatory compliance across global organizations.

Value Proposition

- Enterprise leadership of cybersecurity, GRC, and risk management programs
- Deep expertise across regulatory frameworks (PCI-DSS, ISO 27001, SOX, GDPR, NIST, DoD RMF)
- Proven success building security organizations, reducing risk, and optimizing cost structures
- Strong track record in M&A; cybersecurity diligence, cloud security, and digital transformation
- Trusted advisor to executive leadership, boards, and government agencies

Career Highlights

Enterprise Security Leadership & Transformation

- Led global cybersecurity strategy, governance, and operations across financial institutions, technology firms, and government environments
- Built and scaled security organizations, achieving certifications such as PCI-DSS Level I and ISO 27001
- Reduced operational costs by over \$1M through optimization initiatives

GRC, Regulatory & Risk Management

- Designed and implemented enterprise GRC frameworks aligned with global standards
- Served as primary liaison for regulators and executive leadership
- Led compliance initiatives across banking and government environments

Cloud Security & DevSecOps Innovation

- Architected and deployed secure cloud environments
- Established DevSecOps programs with secure API focus
- Implemented advanced security tooling across SIEM, DLP, IAM ecosystems

M&A; Cybersecurity & Digital Risk

- Led cybersecurity due diligence for M&A; activities
- Developed frameworks to assess cyber risk exposure
- Conducted large-scale third-party risk assessments

Professional Experience

Global Consulting & Technology Platforms

Chief Information Security Officer / Security Executive Leadership

- Directed enterprise cybersecurity programs including GRC and cloud security
- Built high-performing global teams and scalable architectures
- Led transformation initiatives including cost optimization

Education & Credentials
